

Special Issue

Natural Resource and Environmental Economics in Agriculture

Message from the Guest Editor

Dear colleagues, In both agriculture as well as nonagricultural sectors, public sentiment for responsible production has risen to great heights. Livestock producers face growing pressures to reduce odor as well as downstream surface and ground water pollution. Sediment and nutrient transport from row-crop agriculture is often associated with coastal and inland water impairment. Similarly, public and private utilities face regulatory and public pressure to mitigate point-source pollutants emitted as byproducts of their operations. Regardless of the nature and scope of the issue, it has become increasingly clear that careful economic analyses are foundational to sustainable solutions to these challenges. This Special Issue contributes to our understanding of the economic underpinnings of current and emerging natural resource, environmental, and ecological issues. We welcome purely economic analyses as well as interdisciplinary studies within the scope of environmental and natural resource economics related to agriculture.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
