

Special Issue

Resource Conserving Agricultural Practices for Ecological Sustainability

Message from the Guest Editors

Producing more food from finite and dwindling natural resources for an ever-increasing human population is a major sustainability challenge facing humanity in the 21st century. As a result, academic communities and policy makers across the world are looking for new avenues to sustainably produce more food to feed the rapidly growing human population while reducing pollution and resource wastage. However, the changing climatic condition is a growing impediment for sustainable food production as such changes not only result in reducing the availability of critical resources for food production but also the quality and quantity of agricultural produce. In this backdrop, the present Special Issue aims to highlight the promising farm innovations, adaptive strategies, and efficient agronomic practices from diverse agroclimatic zones of the world for sustainable food production and resource conservation in agriculture. This will help in attaining global food, nutritional, and livelihood security and thereby meeting important United Nations Sustainable Development Goals (SDG 1, 2, 3, 13) and their set targets for the year 2030.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
