

## Special Issue

# Machinery Systems and Biological Systems Engineering in Precision Agriculture

### Message from the Guest Editors

With the development of science and technology and social progress, fewer and fewer people engage in agricultural production through physical strength. Advanced agricultural equipment and technology are widely used in farming, planting, management and harvesting of agricultural production. At present, we can see the application of advanced mechanical principles, control systems, navigation, sensors and other technologies in agricultural production. In order to save the test cost, advanced simulation methods and coupling methods also play a crucial role in exploring the mechanism of agricultural equipment. Researchers and engineers are expected to address various challenges toward introducing innovative techniques and instruments, by which sustainable agriculture can be satisfied. In light of this, this Special Issue will comprise original research, reviews, and case studies outlining recent progress and exploring scenarios in the abovementioned research areas. Potential topics include, but are not limited to: agricultural machinery, precision agriculture and smart farming systems, simulation, sensors and other advanced technologies in agricultural production.

### Guest Editors

Dr. Han Tang

College of Engineering, Northeast Agricultural University, Harbin 150030, China

Prof. Dr. Jinwu Wang

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
