Crop Physiological Responses to Abiotic Stress Factors

Message from the Guest Editors

Abiotic environmental stress factors are major constraints to global food security. Plant environmental stresses such as water stress, salinity, cold/hot temperatures, tropospheric ozone, and excess UV radiation might become prevalent in the coming decades due to climate change. Exposure to environmental stress induces altered physiological responses leading to adverse effects on crop growth, development, and productivity. It is essential to understand the physiological mechanisms to environmental stress factors to improve crop productivity and quality under climate change conditions. This Special Issue invites original research articles, opinion papers, and short communications on the following topics: Crop physiological responses to different environmental factors; crop responses to abiotic stresses; stress tolerance mechanisms; crop breeding under stress conditions; improving tolerance; and beneficial aspects of stressors.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
