# Physio–Devo of Source–Sink Relationship Underlying Abiotic Stress Resilience in Crop Plants

### Message from the Guest Editor

Grain yield is considered as the reproductive output that acts as a sink, while growth resilience is often thought of as a source that supports the reproductive organs. To enhance our ability to breed adaptive crops with resilience to individual or combined abiotic stresses, it is essential to gain a better understanding of the source–sink relationship by integrating physiology and development (physio–devo). Submissions on (but not limited to) the following topics are invited: (1) phenomics approaches for the identification of gene alleles underlying the physiological and morphological traits that lead to resilience; (2) modeling source–sink relationships throughout crop development under abiotic stresses; (3) cereal breeding for abiotic stress tolerance; and (4) utilization of crop wild relatives for abiotic stress resilience.

### Guest Editor

Dr. Najeeb Ullah

Agricultural Research Station, Qatar University, Doha, Qatar

### Deadline for manuscript submissions

closed (15 April 2022)

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
