

Special Issue

Cereal Rust Management for Improving Global Food Security

Message from the Guest Editor

The Food and Agriculture Organization of the United Nations estimates that world food production must increase at least 70% by 2050 to keep pace with population growth and achieve food security goals. Rust diseases have been ongoing problems for production of major cereals, and can cause significant yield and quality losses. With the advances in plant pathology, genetics, genome sequencing, resistance breeding and host-pathogen molecular interactions, there lies an enormous potential in developing new technologies and tools for mitigating risks posed by the rust diseases on cereal production. This special issue of *Agronomy* Journal will feature on 'Cereal Rust Management for Improving Global Food Security'. We invite experts to contribute original research, reviews and opinion pieces covering all related topics including rust surveillance, host pathogen interactions, gene discovery, gene mapping, and breeding for resistance to manage cereal rusts.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
