New Methods for Plant Nutrition Management

Message from the Guest Editors

Dear colleagues, In recent decades, food demand has increased in line with the increase in the world population. To satisfy this need, farmers often have recourse to high nutrient inputs, especially mineral fertilizers, but these ones can have a strong impact on the environment, as well as on human health. In order to match all these needs, the scientific community has the task of proposing an innovative approach that can reduce the use of chemical fertilizers, preferring organic compounds, such as organic matter or biostimulants, but also boosting nutrient use efficiency and improving fertilization techniques. Therefore, we encourage the submission of paper regarding the following topics: (1) innovative approaches for fertilization and their impact on the environment; (2) agronomic practices for improving nutrient use efficiency and food quality; (3) organic or integrated farming; (4) use of biostimulants as alternative or integrative compounds to chemical fertilizers.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
