Special Issue

Standards and Ethics in AI

Message from the Guest Editors

There is a swarm of artificial intelligence (AI) ethics standards and regulations being discussed, developed, and released worldwide. This Special Issue of the journal *AI* on "*Standards and Ethics in AI*" will publish research papers on applied AI ethics, including the standards in AI ethics. This implies interactions among technology, science, and society in terms of applied AI ethics and standards; the impact of such standards and ethical issues on individuals and society; and the development of novel ethical practices of AI technology. More specifically, this Special Issue welcomes submissions on the following topics:

- AI ethics standards and best practices;
- Applied AI ethics and case studies;
- AI fairness, accountability, and transparency;
- Quantitative metrics of AI ethics and fairness;
- Review papers on AI ethics standards;
- Reports on the development of AI ethics standards and best practices.
