

Special Issue

Algorithms for Communication Networks (2nd Edition)

Message from the Guest Editors

This Special Issue is devoted to algorithms and protocols that support the operation or design of large networks and/or that are motivated by networking issues.

- Routing algorithms for various types of networks;
- Algorithms/protocols for congestion control;
- Medium access control (MAC) protocols;
- Algorithms for network design and dimensioning;
- Designing, operating, and maintaining virtual substructures, such as network slices and virtual subnetworks;
- Modeling very large networks via novel mathematical methods;
- Approaches for cross-layer design;
- Optimization methods for network-inspired tasks;
- Graph models and graph algorithms motivated by networking problems;
- Models for the systematic analysis and design of the network architecture.

Guest Editors

Prof. Dr. Andras Farago

Department of Computer Science, Erik Jonsson School of Engineering and Computer Science, The University of Texas at Dallas, P.O. Box 830688, MS-EC31, Richardson, TX 75083-0688, USA

Dr. Héctor Migallón

Department of Computer Engineering, Miguel Hernández University, Av. de la Universidad s/n, Ed. Alcudia, 03202 Elche, Spain

About the Journal

Message from the Editor-in-Chief

Algorithms are the very core of Computer Science. The whole area has been considered from quite different perspectives, having led to the development of many sub-communities: Complexity theory (limitations), approximation or parameterized algorithms (types of problems), geometric algorithms (subject area), metaheuristics, algorithm engineering, medical imaging (applications), indicates the range of perspectives. Our journal welcomes submissions written from any of these perspectives, so that it may become a forum for exchange of ideas between the corresponding scientific subcommunities.

Editor-in-Chief

Prof. Dr. Frank Werner

Faculty of Mathematics, Otto-von-Guericke-University, P.O. Box 4120,
D-39016 Magdeburg, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Numerical Analysis)
