Computer Science and Intelligent Control

Message from the Guest Editor

The 5th International Symposium on Computer Science and Intelligent Control (ISCSIC 2021) aims to bring together researchers in the areas related to computer science and intelligent control in a single platform and present their stimulating research and knowledge transfer ideas in both computer science and intelligent control. This symposium welcomes new research in the areas of computer science and intelligent control, such as distributed systems, computer vision, image and signal processing, intelligent systems, robotics, industrial process control, big data analytics, modeling and optimization, and machine learning and artificial intelligence. However, we also recognize that the future for computer scientists and control engineers is one where they will be working in interdisciplinary teams to solve new, complex, and evolving problems that will require innovative solutions. Therefore, we encourage the participation of other disciplines in this conference where multidisciplinary research and knowledge transfer projects are presented.

Guest Editor

Dr. Jie Zhang

About the Journal

Message from the Editor-in-Chief

Algorithms are the very core of Computer Science. The whole area has been considered from quite different perspectives, having led to the development of many sub-communities: Complexity theory (limitations), approximation or parameterized algorithms (types of problems), geometric algorithms (subject area), metaheuristics, algorithm engineering, medical imaging (applications), indicates the range of perspectives. Our journal welcomes submissions written from any of these perspectives, so that it may become a forum for exchange of ideas between the corresponding scientific subcommunities.

Editor-in-Chief

Prof. Dr. Frank Werner

Faculty of Mathematics, Otto-von-Guericke-University, P.O. Box 4120,
D-39016 Magdeburg, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Numerical Analysis)
