Message from the Editor-in-Chief

Acta Microbiologica Hellenica is a peer-reviewed, open-access journal. The first issue was published by the Hellenic Society for Microbiology in Greek in 1956. In 2009, the journal became a quarterly publication, and, in 2016, it became bilingual. For almost seven decades, we have constantly fostered communication and interaction regarding all branches of Medical Biopathology. On behalf of the Editorial Board, I encourage you to submit your original research articles, reviews, and other publications. We look forward to your potential contribution and support. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Athanasios Tsakris

Aims

For almost seven decades, our mission has remained to provide scientists in the fields of Clinical Microbiology, Laboratory Haematology, Medical Biochemistry, and Immunology with outstanding articles that enhance research and education, as well as to offer them more scientific tools, ensuring that they can contribute not only to everyday patients' care, but also to the management of various public health crises.

The COVID-19 pandemic has dramatically changed our lives, undoubtedly challenging the resilience of public health systems worldwide. It has also emphasized the need for more effective ways to conduct, share, and communicate science in ways that can promote public health strategies for the prevention, diagnosis, and control of diseases.

Scope

This journal welcomes submissions on all aspects of medical microbiology and related fields of medical biopathology from authors worldwide, including, but not limited to, bacteriology, parasitology, mycology, virology, the history of microbiology, laboratory hematology, medical biochemistry, and immunology. Also, a particular focus of this journal is the publication of study findings related to animal health and our shared environment in order to achieve sustainable disease prevention and control within the One Health approach.

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Coverage by Leading Indexing Services

Scopus, Biological Abstracts and BIOSIS Previews (Web of Science), and other databases

Rapid Publication

First decisions in 18 days; acceptance to publication in 4 days (median values for MDPI journals in the second half of 2024)
