Antimicrobial Susceptibility Testing in Veterinary Clinical Microbiology

Message from the Guest Editor

I am editing a new article collection entitled “Antimicrobial Susceptibility Testing in Veterinary Clinical Microbiology”, and I wanted to personally get in touch to ask whether you would be interested in contributing a manuscript. Antibiotic resistance in animals is a global growing concern, due to the emergence of pathogens with multi-drug resistance, including clinically important antibiotics and the risk of treatment failures. The findings of this Special Issue will contribute to our knowledge on veterinary pathogens, with relevant importance for clinicians in the veterinary area. In collaboration with *Animals*, we are interested in manuscripts that describe zoonotic or veterinary microorganisms and important findings related to antimicrobial susceptibility. We encourage you to submit an abstract by the 20th of June. The manuscript submission deadline is the 20th of October. Please note that publishing fees are applied to accepted articles, but I could support you in this regard depending on the type of paper.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in 'Agriculture, Dairy & Animal Science'; 16/167 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.0.
