

## Special Issue

# Bacterial and Viral Diseases in Aquatic Animals

### Message from the Guest Editor

In recent years, the emergence of new pathogeny caused serious harm to aquaculture, and the timely diagnosis of diseases according to pathogenesis, epidemiology, and pathology is very important. It is pivotal for an aquatic veterinary clinician to be pliant and open-minded. Fishing ground owners are becoming more and more demanding with regards to their own veterinarian, who must be updated on novel diagnostic technologies in order to provide an excellent service. The aim of this Special Issue is to publish original research papers, case studies, and review articles focusing on the latest advances in aquatic animals' pathogenesis, epidemiology, and pathology. We welcome all experts and researchers that would like to present information in a concise, understandable, and logical format on the current state-of-the-art in aquatic animals veterinary medicine. You are invited to submit either an original research article or a review summarizing research on the pathogenesis, epidemiology, and pathology of aquatic animals.
