

Special Issue

Animal Endocrinology and Medicine Research

Message from the Guest Editor

I am excited to invite you to contribute to this special issue on Animal Endocrinology that I have the honour of editing for *Animal. Endocrinology* has become a dominant field in veterinary medicine with the documentation of new disorders in many domestic and wildlife species. Disorders initially described in human medicine have now been documented in many animals with both similarities and specificities. Comparative endocrinology has benefited both animals and humans as it has allowed a better understanding of hormonal diseases and their pathophysiology. This Special Issue will take a One-Medicine approach to endocrinology focusing on animal studies unravelling pathophysiology of endocrine disorders, improving their diagnosis and enhancing their management in all animal species.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in 'Agriculture, Dairy & Animal Science'; 16/167 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.0.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips
