Pig Reproduction

Message from the Guest Editor

With a rapidly growing world population, food security is becoming an increasing concern. To address this concern, efficient food production is essential. Pork production provides a significant contribution to global food protein availability, particularly in Asia. Additionally, in more developed countries, welfare concerns around how swine are managed also need to be addressed. Efficient pork production is underpinned by the optimal reproductive performance of both sows and boars. Increasingly, this needs to be achieved in a sustainable manner and with due consideration to animal welfare. We invite reviews and original research papers that address the improvement of sow and boar reproductive performance, particularly if they also target sustainability and or animal welfare.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in 'Agriculture, Dairy & Animal Science'; 16/167 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.0.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips
