

## Special Issue

# Recent Advances in Canine Mammary Tumors

### Message from the Guest Editors

Canine mammary tumors (CMTs) are the most common neoplasm in intact female dogs, and about 50% of them are considered malignant. A CMT is a good spontaneous animal model of human breast cancer (HBC) research because it shares many similarities, such as epidemiologic, clinical, genetical, biological and pathological characteristics; additionally, their histological and molecular patterns are very heterogeneous. Different hormones and growth factors influence the occurrence of CMTs, but the pathological mechanisms remain unclear. In addition to circulating hormones, their receptors play a central role in mammary tumor formation (estrogen and progesterone receptors). Surgery is still the frontline treatment, but other therapies can be beneficial regarding patients' survival. Advances in molecular pathways associated with cancer progression have highlighted several aspects in the field, and the development of new treatments may be promising for comparative and translational oncology. This Special Issue aims to publish original research papers or reviews about canine mammary tumors, concerning their diagnosis, prognosis and therapeutics.

## About the Journal

### Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in 'Agriculture, Dairy & Animal Science'; 16/167 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.0.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
