

Special Issue

Zoonoses and Wildlife - One Health Approach

Message from the Guest Editors

This Special Issue on “Zoonoses and Wildlife—One Health Approach” invites the submission of novel research on the wildlife–human interface, including research that investigates the epidemiology of zoonotic transmission pathways, but also how land use changes, population growth, climate change, and other environmental and societal factors might increase the likelihood of spillover disease events from wildlife to humans. Under the “One Health” paradigm, a strong collaboration between veterinary and medical scientists, ecologists, social scientists, and policy makers is required to control zoonotic diseases; thus, submissions of transdisciplinary research on the wildlife–human interface are particularly welcomed.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in 'Agriculture, Dairy & Animal Science'; 16/167 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.0.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips
