

Special Issue

Antimicrobial Stewardship in Pediatrics

Message from the Guest Editors

We would like to invite you to submit your research on antimicrobial stewardship in pediatrics for this Special Issue of *Antibiotics*. Antimicrobial resistance is a global problem that affects us all. As clinicians responsible for human welfare, it is crucial that we treat sick people effectively, but we must also learn to be more prudent in the use of antibiotics. This Special Issue therefore particularly encourages submissions in the area of antibiotic stewardship in the pediatric population. All clinical situations in which these could be effective in antibiotics usage optimisation are welcome to submit. This concerns general pediatrics, perioperative management in all surgical areas, pediatric hematology and oncology, patients with immunological disorders, etc. The relationship between antimicrobial use and resistance also requires further investigation, and we welcome submissions in this area as well. Keywords: antibiotics stewardship; antimicrobial resistance; treatment; antibiotic prophylaxis; monitoring

About the Journal

Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

Editor-in-Chief

Prof. Dr. Nicholas Dixon
