Dietary Polyphenols in Contemporary Disease

Message from the Guest Editor

Diet related chronic conditions of modern society including diabetes, cardiovascular disease, hypertension, obesity, neurodegenerative disease and cognitive decline, are one of the largest causes of death. Diet is a well-recognised modifiable risk factor that can help reduce contemporary diseases, improving healthy aging and quality of health span. Polyphenols are a diverse and heterogenous group of secondary plant metabolites, found in a wide variety of fruits, vegetables, herbs, spices and many other plant foods. Continuing research highlights the dynamic capacity of polyphenols in their ability to exert potential health effects through several mechanisms. We would be happy to receive your manuscript related to this topic. Once the Special Issue is closed, we will share it with relevant scholars to promote all contributions. Antioxidants (<http://www.mdpi.com/journal/antioxidants>) is an Open Access journal with high visibility; we also provide free English editing after the acceptance of your paper. The Article Processing Charges (APC) are 500 CHF (Swiss Francs) per accepted paper. We look forward to collaborating with you in the near future.

About the Journal

Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

Editor-in-Chief

Prof. Dr. Alessandra Napolitano
Department of Chemical Sciences, University of Naples “Federico II”,
Via Cintia 4, I-80126 Naples, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
