

## Special Issue

# Mechanical Design Technologies for Beam, Plate and Shell Structures

### Message from the Guest Editor

This Special Issue will bring together theoretical studies or applied works on state-of-the-art computational modeling or experimental techniques used in the mechanical design of general structural engineering systems embodying beam, plate, and shell structural elements. Advances in fundamental theories, approximation methods, computational techniques, and experimental testing technologies, addressing modern trends and complicating effects, such as complex shapes, multi-layered structures, lattice designs, material anisotropy, structural damping treatments, smart structures, additive-manufactured parts, or complicated analysis, such as non-linear material and geometric behaviors, multi-scale approaches, dynamic analysis, and multi-physics design activities, are especially welcome.

---

### Guest Editor

Prof. Dr. César M. A. Vasques

Mechanical and Materials Engineering, School of Technology and Management, Instituto Politécnico de Viana do Castelo, 4900-348 Viana do Castelo, Portugal

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Magd Abdel Wahab

Laboratory Soete, Faculty of Engineering and Architecture, Ghent University, Technologiepark Zwijnaarde 903, B-9052 Zwijnaarde, Belgium

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), Scopus and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.1 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the second half of 2024).
