Natural Language Processing: Novel Methods and Applications

Message from the Guest Editors

We are inviting submissions to this Special Issue, entitled “Natural Language Processing: Novel Methods and Applications”. Natural language processing is becoming ubiquitous in our life. It is used in several fields and contexts, ranging from simple voice assistants for house and car automation to complex systems that retrieve similar judicial cases for the court. In the last decade, the availability of a large volume and variety of textual documents has attracted the interest of several scientific and humanistic areas. Therefore, the main objective of the Special Issue is to foster a shared view on this topic, integrating ideas and real-case applications from different communities. In this Special Issue, we invite submissions exploring novel research frontiers and recent advances in this field, demonstrating how the interaction of different communities (such as Psychology, Law, etc.) and research fields (such as logic, human–computer interaction, deep learning, etc.) can both benefit from natural language processing and benefit the process itself.

Guest Editors

Dr. Giovanni Siragusa

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
