

## Special Issue

# New Trends in Network and Information Security

### Message from the Guest Editor

The new trends in network and information security are a growing concern for many businesses. The rapid growth of technologies, such as mobile computing, cloud computing, and the Internet of Things (IoT), increases potential attack vectors for adversaries targeting networks and data. Furthermore, the COVID-19 pandemic further compounded the attack vectors and the associated security threats. The pandemic altered how and where we all work, making us easier targets to cybercriminals since users are more exposed to cyber attacks than ever because most duties are performed remotely over the internet, and sometimes over a public WiFi networks, away from the more secure corporate networks.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
