Hygrothermal Behaviour of Cultural Heritage and Climate Change: Second Edition

Message from the Guest Editors

We are currently inviting submissions to this Special Issue on “Hygrothermal Behaviour of Cultural Heritage and Climate Change: Second Edition”. Authors are encouraged to publish their original theoretical and/or experimental research on the hygrothermal behaviour of cultural heritage, climate monitoring campaigns, simulations, preventive conservation, building rehabilitation, energy efficiency, climate control strategies, thermal comfort and indoor air quality, climate change and sustainability. Interdisciplinary studies and papers that incorporate more than one topic or more than one methodology (e.g., experimental, modelling, analysis, and optimization) are encouraged. Review papers are also welcome.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
