

Special Issue

Advances in HCI: Recognition Technologies and Their Applications

Message from the Guest Editor

A trusted Human-Computer Interaction (HCI) is a challenge within human-centric AI ecosystems and requires the harmonious collaboration of many interdisciplinary fields. A critical challenge in implementing trusted HCIs lies in enhancing the recognition capabilities of machines and ensuring that these machines perform the correct physical actions. Such actions should be both legible to humans and in coordination with them. Recognition technologies that utilize AI and machine learning assist in solving various problems in various fields. We invite authors to contribute to our Special Issue with insights, studies, and innovations in advanced recognition technologies. Submissions may address topics including:

- facial recognition
- voice recognition
- object recognition
- text recognition
- gesture recognition
- emotion recognition
- biometric recognition
- pattern recognition
- behaviour recognition
- speech recognition
- license plate recognition
- brand recognition
- character recognition
- medical image recognition

Guest Editor

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
