

Special Issue

Application of Artificial Intelligence to Robotics

Message from the Guest Editors

Artificial Intelligence and robotics are digital technologies that are attracting more attention now and will have a significant impact on humanity in the foreseeable future. As research on AI and robotics has thrived in these years, global scientists and practitioners are faced with the impending challenges emerging in the implementations of AI-integrated robots in medicare, psychological, traffic, and social development. This Special Issue is focused on publishing high-quality papers about novel trends and ground-breaking insights into the application of AI to robotics. We expect conceptual and experimental studies related to new developments and challenges in the areas.

Guest Editors

Prof. Dr. Simon X. Yang

Advanced Robotics & Intelligent Systems (ARIS) Lab, School of Engineering, University of Guelph, Guelph, ON N1G 2W1, Canada

Prof. Dr. Maki Habib

School of Sciences and Engineering, The American University in Cairo, New Cairo 11835, Egypt

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
