

Special Issue

Novel Spectroscopy Applications in Food Detection

Message from the Guest Editor

This Special Issue aims at gathering prominent scientific works focused on the development of novel Raman-based approaches for rapid detection of analytes in a wide range of research areas, from food safety and traceability to biomedical application and nanotechnologies. We expect contributions concerning RS and its various declinations, such as surface-enhanced Raman (SERS), tip-enhanced Raman (TERS), hyper-Raman, coherent anti-stokes Raman (CARS), and stimulated Raman (SRS). Manuscripts aimed at these goals will be considered for publication. Keywords Raman spectroscopy SERS TERS chemical analysis food analysis biochemical analysis novel devices in situ analysis real-time detection nanotechnology

Guest Editor

Dr. Chiara Portesi

Quantum Metrology and Nano Technologies Department, INRIM—National Institute of Metrological Research, I-10135 Torino, Italy

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
