

Special Issue

Biocompatible Materials

Message from the Guest Editor

I am pleased to announce an upcoming Special Issue focusing on biocompatible materials. It my pleasure to invite you and members of your research team to submit an article for this Special Issue. Biocompatible material is now defined as a substance, or a combination of substances, which has been engineered and processed to interact with components of living systems with an appropriate response in a specific application. We invite authors to contribute original research or reviews describing detailed experimental studies, investigations and novel developments dealing with important issues facing the synthesis, design, fabrication and characterization of biocompatible material for clinical applications, including, but without being limited to diagnosis, therapies, regenerative medicine and implantable devices.

- Biomaterials
- Regenerative Medicine
- Medical Devices
- Drug Delivery
- Medical Devices
- Diagnostic Systems

Guest Editor

Prof. Dr. Giovanni Vozzi

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
