

## Special Issue

# Sustainable Smart Cities: Building New Services and Products with Digital Technologies

### Message from the Guest Editors

All over the world, citizens, as actors in building cities to face current and future environmental and social challenges. It has triggered several initiatives for the development of sustainable smart cities. In this regard, the continuous growth of digital technologies has contributed to the development of innovative products and services. New technological solutions have allowed cities to undergo profound and intelligent transformations, aimed at creating value-added products and services for their fellow citizens. Therefore, the development of sustainable smart cities ends up being driven by the use of smart services and products that often make use of artificial intelligence (AI) and robotics technologies. Despite advances in the development of intelligent AI-based products and services, and robotic solutions to respond to the needs and expectations of people, there is still a long way to go to tackle new contemporary challenges. It is in this regard that this Special Issue features original research articles focusing on sustainable smart cities that enable scholars, public servants, and business managers to respond to new and exciting challenges.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
