

## Special Issue

# State-of-Art of Improving Food and Water Quality and Analysis

### Message from the Guest Editors

With the development of society, there has been great progression in food and water preservation technology; however, there are increasing questions arising concerning pollution. Recently, more attention is being paid to food and water quality and safety. Food and water quality and safety are predominantly assessed by performing food and water analyses. However, with the development of technology for these analyses, some natural active ingredients and slightly polluted ingredients of food and water have also been discovered. The purpose of this research topic is to present the latest research progress in food and water quality and analysis, including new technology for food analysis and food preservation, and food quality and safety control technology, as well as new technology for water quality analysis, water pollution analysis, water quality and safety control technology, and so on.

Keywords:

- food quality control
- food chemistry
- food preservation
- food and water contamination
- food and water safety
- functional component analysis
- water analysis
- microcontamination analysis

---

### Guest Editors

Dr. Dan Wu

College of Biosystems and Food Science, Zhejiang University, Hangzhou 310058, China

Dr. Huan Cheng

Department of Food Science and Nutrition, National-Local Joint Engineering Laboratory of Intelligent Food Technology and Equipment, Zhejiang Key Laboratory for Agro-Food Processing, Zhejiang University, Hangzhou 310058, China

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
