

Special Issue

New Trends in Efficient Buildings

Message from the Guest Editors

This Special Issue aims at collecting original research that addresses the theme of efficient buildings in a broader way, including different perspectives and analyses. In this context, this Special Issue welcomes original research covering all aspects concerning the energy efficiency assessment. Topics of interest include but are not limited to:

- all-encompassing assessment methodologies
- energy and design implications
- comfort-related issues
- sustainability of the built environment (e.g., environmental, economic, social, etc.)
- interactions between occupants and the building
- AI-based applications
- energy performance
- Intelligent energy management
- indoor occupant comfort
- building energy performance
- renewable energy technologies
- sustainable buildings
- smart buildings

Guest Editors

Dr. Francesco Salamone

Dr. Lorenzo Belussi

Dr. Ludovico Danza

Dr. Francesco Guarino

Dr. Sonia Longo

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
