

Special Issue

Emerging Internet of Things (IoT) Technologies and Applications

Message from the Guest Editor

The aim of this Special Issue is to present a set of articles focusing on the state of the art, the trends and recent advances, and the case studies and applications for sensors, actuators and information technology. The domain of interest in their applications are:

- Transportation;
- Healthcare;
- Water;
- Energy;
- Industry;
- Education;
- City Infrastructure.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
