

Special Issue

State-of-Art of Soil Dynamics and Geotechnical Engineering

Message from the Guest Editor

The ground-motion and soil liquefaction is a leading cause of seismic hazard worldwide. Past damage in geotechnical engineering-related soil dynamics underline the importance of accurate assessments of soil dynamic behaviors. The assessment desired a shared and interdisciplinary reserches involving geotechnical engineers, seismologists, geologists, and geophysicists. State of the art of soil dynamics and geotechnical engineering evaluates these various reserches focusing on those developed within the past few years. The newly theoretical analysis, pritical developments, and recommended strategies could enhance the development of geotechnical engineering. To this purpose, new theories, experimental approaches, and numerical analyses related to the soil dynamic in geotechnical engineering are needed to safety protect and mitigate seismic hazazards.

Keywords:

- soil dynamic
- seismic hazazard
- liquefaction
- geotechnical engineering
- safety protection
- urban development

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
