

Special Issue

Systems Engineering: Availability and Reliability

Message from the Guest Editors

Current trends in Industry 4.0 are largely related to issues of reliability and availability. As a result of these trends and engineering systems' complexity, research and development needs now refer to new solutions in the integration of intelligent machines or systems, with emphasis on changes in production processes aimed at increasing production efficiency or equipment reliability. Proposed topics of the Special Issue include but are not limited to the following:

- Smart factories and Industrial Internet of Things (IIoT), machine to machine communication (M2M);
- Data mining and Big Data
- Digitalization and virtual reality, robotics;
- Systems analysis, simulation, design, and modeling;
- Real time production scheduling;
- Production systems management and maintenance;
- Software tools for production and maintenance;
- Knowledge management and decision support systems in production;
- Artificial Intelligence methods in decision support systems;
- Predictive maintenance;
- Maintenance planning and scheduling;
- Reliability and risk assessment.

Guest Editors

Dr. Katarzyna Antosz

Dr. Jose Machado

Prof. Dr. Dariusz Mazurkiewicz

Prof. Dr. Dario Antonelli

Dr. Filomena Soares

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
