

Special Issue

Allicin: Source, Analysis and Applications

Message from the Guest Editor

This Special Issue of *Applied Sciences* therefore aims to bring together new developments in the field of allicin research, starting from the sources of allicin, be it the garlic plant or chemical synthesis, to questions about how allicin works and the application of allicin in pharmacy, food technology, and plant protection. Because allicin cannot be separated from its downstream products (after all, allicin is an extremely reactive sulfur species) aspects of degradation products as well as chemical-analytical questions can also be submitted for this Special Issue. The multitude of scientific disciplines makes research on allicin very exciting! Perhaps this collection of articles can also help to deepen and further expand the interdisciplinary exchange in order to find new approaches to applying allicin. Perhaps you are also working on a chemical topic and use allicin as a “lead substance” for modified but allicin-derived compounds? If so, I look forward to your contribution as well.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
