

Special Issue

Emerging Contaminants in Environment

Message from the Guest Editors

Potential risks associated with the release of emerging contaminants into the environment have become an increasingly important issue in environmental health. This concern has been driven by the widespread detection of emerging contaminants in the environment. Most of these contaminants are continuously introduced in the environment and, albeit detected at trace levels, they are of concern as they can promote deleterious consequences at low concentrations, namely in the aquatic biota. There is a lack of knowledge on emerging contaminants' source, fate, occurrence, toxicity and environmental risk assessment, important issues for a proper risk evaluation and management. Therefore, this Special Issue will tackle the source, fate, occurrence, toxicity and risk assessment of emerging contaminants in the environment.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
