

Special Issue

Advanced Extraction, Separation and Purification Processes

Message from the Guest Editors

The Special issue on “Advanced Extraction, Separation and Purification Processes” of Applied Sciences covers a set of cutting-edge research topics related to the separation or recovery of compounds paying special attention to recent advances with respect to the current state of the art and its implementation towards the achievement of the objectives of sustainable development. This Special Issue intends to gather medium-sized review papers or original research articles featuring relevant and recent developments or achievements in advanced separation processes and their applications in different fields. Papers can cover experimental or theoretical aspects or both. Potential authors are invited to submit their contributions any time from now to the end of February 2021. Dr. Lucia Gomez-Coma

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
