

Special Issue

Material Science, Implants, and Peri-Implant Tissues

Message from the Guest Editor

This Special Issue of *Applied Sciences* on “Biomaterials, Implants, and Peri-implant Tissues” will focus on recent progress in the development of implants, scaffolds, and surgical techniques in peri-implant tissue healing/regeneration. Biological or biomechanical responses to implant and biomaterial manufacturing, surface functionalization, chemical, mechanical and antimicrobial properties, which can be suggested ways to solve the problems of traditional dental implant care, are particularly emphasized. It is my pleasure to invite you to submit a manuscript to this Special Issue; original contributions (scientific basis, experimental and clinical studies) are welcome.

Guest Editor

Prof. Dr. Gaetano Marenzi

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
