

# Special Issue

## Feature Papers in Aerosol Research

### Message from the Guest Editor

We are pleased to announce that *Atmosphere* is now compiling a collection of outstanding papers in the field of aerosol research. We welcome contributions from the aerosol research community as well as recommendations from Editorial Board Members. The purpose of this Special Issue is to publish a set of insightful and influential papers composed of either original contributions or reviews. All papers in this Special Issue will be collected into a printed edition book. Contributions from all fields of aerosol science are welcome including, but not limited to, observational and modelling studies related to atmospheric processing of aerosols, air quality and climate impacts, and new methodologies.

## About the Journal

### Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

#### Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
