

## Special Issue

# Applications of Integration in Mathematical Analysis

### Message from the Guest Editors

The integral has served as a versatile tool in a wide range of mathematical fields, from integral transforms and integral equations to the task of defining linear functionals and norms on function spaces. This Special Issue aims to be a general collection of new and novel results that utilize integration techniques in some capacity. We look forward to your contributions to this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain

---

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics, Applied)
