

Special Issue

Approximation Theory and Related Applications II

Message from the Guest Editor

This issue is a continuation of the previous successful Special Issue “Approximation Theory and Related Applications”. Thank you for all authors and reviewers. We are glad to announce this Special Issue to collect more works in various aspects of approximation theory. In this Special Issue, we will cover the field of approximations in special function classes, fractional approximations, approximation operators, approximations of functions of infinitely many variables, numerical analysis, harmonic analysis, spline approximation, stochastic approximation, asymptotic analysis, and applications of approximation theory. Our goal is to gather articles reflecting new trends approximation theory and related topics.

Guest Editor

Prof. Dr. Yuriy Kharkevych

Department of Theory of Functions and Methods of Teaching Mathematics, Lesya Ukrainka Volyn National University, 13 Voli Ave., 43025 Lutsk, Ukraine

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

Journal Rank:

JCR - Q1 (Mathematics, Applied)
