

Special Issue

Sparkling Wines

Message from the Guest Editors

Sparkling wines have great economic importance in all wine-producing areas of the world and have attracted the interest of researchers in this category of wines in the last few years. Several aspects have been considered, including innovative yeasts, advanced oenological techniques, new varieties, and their effects on aromatic and sensory profiles. Moreover, the issue of “light-struck taste”, which can affect sparkling wines, has been deeply studied to prevent it. Consumer preferences were also surveyed. The aim of this Special Issue is to collect recent studies on sparkling wines on all the topics concerning this wine category.
