

Special Issue

Functional Beverages—Current Concepts Through to Implementation into the Food Chain

Message from the Guest Editors

The field of functional beverages is a rapidly growing sector of the food industry globally. Functional beverages are developed and designed to provide consumers with additional potential health benefits that extend beyond their nutritional composition and possess appealing sensory characteristics. Processing technologies of functional beverages can be traditional/conventional or advanced and the new technological applications are continuously being implemented. This also adds to the wide array of food ingredients that are emerging on the food market and allows their use in the manufacturing of functional beverages, offering endless formulation opportunities. This Special Issue is expected to provide up-to-date information on all aspects of research innovations and high-quality reviews on processing, storage and packaging technologies, physico-chemical, microbiological and sensory aspects, functional properties, quality and safety, nutrition and health benefits of functional beverages. This Special Issue is also open for submission of concept papers, reviews and original research manuscripts.

Guest Editors

Dr. Senaka Ranadheera

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Edgar Chambers IV
Center for Sensory Analysis and Consumer Behavior, Kansas State
University, Manhattan, KS 66506, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), FSTA,
CAPlus / SciFinder, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Food Science and Technology) / CiteScore - Q1
(Food Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 20.6 days after
submission; acceptance to publication is undertaken in 3.9
days (median values for papers published in this journal in
the first half of 2024).
