Chronic Kidney Disease: Diagnosis and Treatment: 2nd Edition

Message from the Guest Editors

Chronic kidney disease (CKD) is defined as decreased kidney function shown by glomerular filtration rate (GFR) of less than 60 mL/min per 1.73 m², or presence of one or more markers of kidney damage (including albuminuria, proteinuria, hematuria, urine sediment abnormalities, electrolyte abnormalities due to tubular disorders, abnormalities on histology, structural abnormalities detected by imaging, or history of kidney transplantation), and at least 3 months of duration. The second edition of this Special Issue, "Chronic Kidney Disease: Diagnosis and Treatment", is dedicated to original papers, brief reports, or reviews that provide further understanding or novel opinions on diagnosis and treatment for CKD. For scholars, traditional cell culture models may be not adequate for studying the functional intricacies of the kidney. Recent experiments have offered improvements for understanding these systems, including organoid modeling, 3D bioprinting, decellularization, microfluidics, and other potential applications of kidney bioengineering.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
