

Special Issue

Robotics in Medical Engineering

Message from the Guest Editors

The rapid development of robot technology has led to its wide application in the medical field, and, due to its desirable features of accuracy, versatility, repeatability and intelligence, medical care and fundamental investigations in the fields of medicine and life science have made significant progress in recent decades.

Robotic surgical systems enable people in remote areas to benefit from high-quality medical services through teleoperation technology, and intelligent elderly care robots alleviate the problem of population aging to a certain extent. Additionally, high-performance sensors make it possible for us to deepen the understanding of life, as high-resolution medical imaging equipment and artificial intelligence diagnosis technology can assist doctors in proposing more effective treatment plans. Since the application of robotics in the medical field has received extensive attention from specialists around the world, we are launching this Special Issue, entitled “Robotics in Medical Engineering”, which welcomes original research articles, reviews and short communications including, but not limited to, the abovementioned topics.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
