

## Special Issue

# From Yeast to Biotechnology

### Message from the Guest Editor

Yeast is one of the main workhorses in biotechnology owing to its metabolic versatility, robustness, and the availability of biomolecular tools. For decades, *Saccharomyces cerevisiae* has been engineered to function as microfactory for the production of relevant compounds as well as its recombinant machinery has been exploited in molecular biology. Despite the fact that *S. cerevisiae* is probably that most widely used in industrial applications, new players such as *Pichia pastoris* or *Yarrowia lipolytica* are emerging. For this Special Issue “From Yeast to Biotechnology” we invite authors to submit articles covering all aspects of this theme, including, but not limited to, yeast engineering for high-value compound production, yeast genome engineering, computational design/modeling/analysis applied to yeast biotechnology, methods to characterize yeast, yeast as biomolecular toolbox, yeast biosensors, and/or yeast industrial fermentation processes.

### Guest Editor

Dr. Eva Garcia Ruiz

Department of Biocatalysis, Institute of Catalysis and Petrochemistry, Spanish National Research Council (ICP-CSIC), 28049 Madrid, Spain

### Deadline for manuscript submissions

closed (30 September 2020)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2024).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
