

## Special Issue

# Radio Nuclide Therapy: From Molecular to Cure

### Message from the Guest Editor

After the introduction of radioiodine therapy for thyrotoxicosis and differentiated thyroid cancer in the middle of the last century, radionuclide therapy (RNT) underwent an enormous development exploring innovative ways. Despite this, RNT faces many challenges and limitations: - A molecular vector with high affinity and specificity for the tumor target;- A nuclide, preferable a true theranostic, with the emission and effective half-life fitting with uptake rate and residence in the target;- The chelator and cages;- Nanogenerators;- tumor cells kinetics and metabolism;- cell radiobiology;- Combined use with chemotherapeutics, biological drugs and EBRT, beta and alpha sequence. We cordially invite authors in the field to submit original research or review articles pertaining to this important and fast-progressing field of biomedicine.

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.3 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2024).
