Advances in Lung Diseases of Neonatal Medicine

Message from the Guest Editor

Infants sometimes suffer from several lung diseases during their neonatal life, such as transient tachypnea of the newborn (TTNB), respiratory distress syndrome (RDS), meconium aspiration syndrome (MAS), pneumonia, pneumothorax, congenital diaphragmatic hernia (CDH), and bronchopulmonary dysplasia (BPD). Despite significant advances in perinatal and neonatal medicines, physicians and researchers are still trying to improve neonatal mortality and morbidities, potentially affecting both short- and long-term pulmonary outcomes in adulthood, using new techniques including new methods of surfactant administration for RDS, fetal therapy for CDH, and cell therapies for BPD. We invite investigators to contribute original research as well as review articles addressing recent advances in lung diseases of neonatal medicine and their effects on both short-term and long-term pulmonary outcomes in children, adolescents, and adults. At the same time, research regarding the understanding of molecular mechanisms based on pharmacological treatments is welcome.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.3 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2024).
