

Special Issue

Anti-angiogenesis Therapeutics in Cancer, Ocular and Skin Disorders

Message from the Guest Editor

The aim of this Special Issue is to cover the current status and future directions in the discovery and development of novel anti-angiogenesis strategies in oncology, eye diseases such as diabetic retinopathy (DR), and age-related macular degeneration (AMD), as well as dermatological disorders such as rosacea, poikiloderma, and psoriasis. The Special Issue aims to cover preclinical and clinical steps involved in the discovery and development of anti-angiogenesis targets in cancer and to discuss mechanisms involved in the modulation of angiogenesis in relation to cancer therapy. FDA-approved anti-angiogenesis agents will be reviewed. Furthermore, the implications of nanotechnology in expanding the utility of existing and novel anti-angiogenesis strategies in various pathological angiogenesis-associated disorders will also be reviewed.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.3 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2024).
