

Special Issue

Feature Papers in Clinical Informatics Section

Message from the Guest Editor

This Special Issue, on featured papers in clinical informatics, focuses on the latest research and advancements in the field of clinical informatics. The selected papers cover a wide range of topics, including electronic health records, health data management, decision support systems, telehealth, and healthcare analytics. These papers provide valuable insights into the integration of technology and healthcare, highlighting the potential for improved patient care, enhanced data analysis, and streamlined clinical workflows. Researchers, practitioners, and policymakers will find these feature papers to be a valuable resource in advancing the field of clinical informatics.

Guest Editor
