Special Issue

Evolutionary Strategies in Biological Systems Repurposed for Public Safety and Health

Message from the Guest Editors

This Special Issue aims to leverage recent advances in various interrelated fields that aim to uncover principles of natural selection shared within biological systems across the biosphere. The overarching aim is to develop new tools and strategies that can benefit humanity through greater health and safety. The Special Issue welcomes original research and review articles as well as hypothesis and position papers from both experimental and modeling approaches aimed at the study of natural design and evolutionary principles. We highly encourage submissions from multidisciplinary efforts across the domains of science and policy.

Guest Editors

Prof. Dr. James L. Olds
Schar School, George Mason University, Fairfax, VA 22030, USA

Dr. Nadine Kabbani
School of Systems Biology, George Mason University, Fairfax, VA 22030, USA

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Stanislav N. Gorb
Department of Functional Morphology and Biomechanics, Zoological Institute, Kiel University, 24118 Kiel, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q2 (Biomedical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2024).
